

Tenth

Brand Guide

Version 1.0 · September 2026

Bill to the tenth. Reconcile to the cent.

Tenth

A tenth of an hour is six minutes. It is the smallest unit a law firm bills in, the unit every timesheet is kept in, and the difference between an invoice a client pays and one they question.

The product is named for that unit because that is where its work happens: capturing the tenth, pricing it correctly, discounting it under the terms the firm actually agreed to, and reconciling what was billed against what is held in trust. The name is short enough to say on a call, plain enough that a lawyer needs no explanation, and open enough that it never boxes the product into invoicing alone.

WRITTEN

Always **Tenth**. Never *10th*, *TENTH*, *tenth* mid-sentence, or *Tenth.io* in running text. No registered mark until the application issues.

SAID

"Tenth", as in the fraction. In a sentence: *"We bill out of Tenth."*

DESCRIPTOR

Billing & Trust for Law Firms. Sits under the wordmark in the stacked lockup and in the first line of any introduction. It is not part of the logo artwork.

LEGAL

Knockout searching in Classes 9, 36 and 42 is still outstanding, as is the domain. Nothing here should carry a ® until then.

What it says

Bill to the tenth. Reconcile to the cent.

Recommended. Says both halves of the product — time billing and trust reconciliation — in the brand's own vocabulary.

Every tenth accounted for.

Shorter, warmer. Good for the app splash and social.

The unit of legal billing.

Definitional. Works as a subhead under the wordmark on a title slide.

Nothing rounded. Nothing missed.

Sharper, for paid placements and comparison pages.

Time, trust, and everything between.

Broadest. Use only where the audience already knows the category.

Voice

PRECISE

Name the number, the rule, the deadline. "Applies to hourly fees only, if paid in full within 10 days." Not "flexible discounting".

UNHURRIED

No exclamation marks, no urgency, no countdowns. The audience is billing on the last day of the month; the software should feel calm.

PLAIN

Write the way a good paralegal explains something to a client. No "seamless", "effortless", "supercharge", "revolutionise".

ACCOUNTABLE

Say what the software does and does not do. It is billing software, not legal advice; the firm remains responsible for its own compliance.

The mark

A dial divided into ten. Nine graduations sit on the ring; the tenth stands proud of it, in Signal Cobalt.

It reads three ways at once — six minutes of an hour, one part in ten, and a single graduation marked on a scale. Drawn in stroke rather than fill, it stays legible from a 512 px app icon down to a 16 px favicon, and it survives a fax.

Ring	10 segments, 36° each, 1.6° gaps
Stroke	11 units on a 100-unit grid (t)
The tenth	radius 35, stroke 17, at twelve o'clock
Clear space	2t on every side
Minimum	16 px digital · 5 mm print

64 PX

32 PX

16 PX · MINIMUM

REVERSED

MONO

Construction

The mark is built on a 100-unit grid. Ten radials at 36° divide the ring; the stroke weight **t** is 11 units and every other measurement is expressed in it. The tenth is drawn on a wider radius (35) at a heavier weight (17), so its outer edge clears the ring by half a stroke — enough to read as raised at 16 px, not so much that the silhouette stops being a circle.

Clear space is **2t** — 22 units, a fifth of the mark's width — measured from the outer edge of the ring, not from the tenth. Nothing sets inside it: no rule, no type, no page edge.

Lockups

PRIMARY · HORIZONTAL

**Tenth**

STACKED

REVERSED

Tenth

WORDMARK ALONE

ONE COLOUR

APP ICON

The horizontal lockup is the default. Use the stacked lockup only where width is constrained — a login card, a business card, a square avatar. The wordmark alone is for places the mark already appears (an app header above a marked favicon). Never rebuild a lockup by hand; the spacing is part of the artwork.

What not to do

Don't recolour the mark

The live segment is Signal Cobalt or nothing. No gradients, no second accent.

Don't rotate the mark

The tenth sits at twelve o'clock. Rotating it makes it a chart, not a dial.

Don't fill the ring

The mark is drawn in stroke, never as a solid pie.

Don't stretch the lockup

Scale proportionally. The gap between mark and wordmark is fixed at 0.52 cap heights.

Don't add effects

No shadows, bevels, outer glows, or containers other than the supplied app-icon tile.

Don't set the wordmark yourself

Use the supplied outlined artwork. Re-typing it loses the -3% tracking.

Co-branding

Tenth is a standalone product brand. It carries no firm endorsement, no "a product of" line, and no second logo in the lockup. Where a firm's identity must appear alongside it — a printed invoice, a client portal — the firm leads and Tenth is absent from the document entirely. Printed output belongs to the firm that sends it.

Client trust (IOLTA)

#0E6E7A

The trust rule. Client trust money is never shown in the same colour as operating money. Teal is reserved for IOLTA figures, trust ledgers and anything drawn from trust — nothing else in the product may use it. A misread between the two is the error the product exists to prevent.

Cobalt on white measures 6.8:1 and white on cobalt 6.8:1 — both clear AA at every size the product uses. Cobalt never carries meaning about money; it marks the action, not the amount.

Typography

Geist Sans

Wordmark, interface, headings and body. Semibold 600 for the wordmark and headings, medium 500 for controls, regular 400 for text. Tracking tightens as size grows: -3% at display, -2% at headings, -0.6% at body.

Geist Mono

Every figure that represents money or time. Tabular by default, so columns of dollars align on the decimal down a 40-line invoice. Never used for prose.

ROLE	FACE	SIZE / LINE	TRACKING	EXAMPLE
Display	Geist 600	30 / 1.15	-0.03em	Statement of Account
H1	Geist 600	21 / 1.2	-0.022em	Retainers & Trust
H2	Geist 600	16 / 1.25	-0.015em	Trust Balances by Client
Body	Geist 400	13.5 / 1.5	-0.006em	Draft the private placement memorandum.
Micro	Geist 600	10.5 / 1.45	0.14em, caps	PROFESSIONAL SERVICES
Figures	Geist Mono 400	matches row	-0.01em	\$1,303.00 · 2.60 hrs

Both faces are licensed under the SIL Open Font License 1.1 and are embedded in the product, so a licensed copy carries no font liability and renders identically offline.

What ships with this guide

LOGO PACK

15 SVGs and 30 PNG exports — mark, wordmark, horizontal and stacked lockups, reversed and one-colour variants, app icons and `favicon.ico`. The wordmark is supplied as outlines; no font is required to place it.

PRODUCT

The application, re-skinned and shipping the brand: Geist embedded for offline use, cobalt actions, monospaced figures, neutral document ink.

DESIGN SYSTEM

`tokens.css` and `tokens.json` — 43 light tokens with a full dark override, plus the component kit showing every control in both themes.

GO TO MARKET

Landing page, one-page sell sheet, email signature and social card, all self-contained.

Licence and attribution

Geist Sans and Geist Mono are © Vercel, released under the SIL Open Font License 1.1 — free to embed and redistribute inside licensed software, with the licence text retained. The mark and wordmark artwork are original to this project. No third-party imagery is used anywhere in the package.

Still outstanding

USPTO knockout search in Classes 9, 36 and 42 · domain acquisition · Pantone and CMYK matching for print · a decision on whether the product ships under a firm licence or a standalone entity.
